

THE AMERICAN PEOPLE'S POLICY & BUDGET REFERENDUM 2018

"Our Government, our Policies, our Budget."

Date:

★ Dear

This letter and completed Policy & Budget Ballot is being sent to you as a recordation of the Policies and Budget I am directing you to represent on my behalf. The American people are beginning to realize that Policies and the Budget are the personal property of the 1%. The TwoParty and even unaffiliated local politicians say "platforms are irrelevant" or ignore the policies and platforms they did promise. In the last 50 years incremental consolidation of American politics fueled by unregulated capital has turned the entire US political landscape into a monopoly arrangement for the 1%, Capitalism and Commerce. The TwoParty has ruthlessly controlled any and all opposition to their joint neoliberal, neocon empire. Consequently any policies which might serve to benefit the society as a whole, to provide a Public Commons for the People, never get put into place. This must end before unregulated Commerce and profit exhaust the US and even the entire Planet.

The purpose of governments is to provide for the social needs of humanity. Serving commerce and profit over people yield monetary benefits solely to the 1%. This Ballot Referendum project exists to reverse that existing unfortunate politic and replace it with self-governing by the 99%. The Policies voted on the attached Ballot, if passed, would create a socialist egalitarian society where wealth and income have been regulated and redistributed to benefit all the People and in particular the 99%. The 1% will be able to always have more than they need, but not so much that enables them to withdraw from social responsibility to the People's Public Commons that make their success possible. "Tax the rich" are 3 words unspoken for over 40 years by the 1%, it's TwoParty and MSM. No longer. We will refund all that was defunded and expand every sector of Public Commons to serve the needs of the 99%.

Please record all of my Policy votes, and those of others as they come in to you. Legislate and create Budgets that reflect these priorities. As time moves along and the People realize directing Policy is the only way to get the self-governing egalitarian society we desire, the directives will become mandatory. Elected officials can join in and perform their legislative services as directed by us, or they can retire and we will find replacement legislative talent. We will later problem solve, design and implement Direct Democracy to elect all Policy & Budget to create the world we desire.

Sincerely,
